

## **Scrum Standup**

- What did I work on yesterday?
- What am I working on today?
- What issues are blocking me?

### **Chae**

Renamed project

Will continue on profile page

No blockers

### **Sepehr**

Admin functionality for job offers like modify status,delete and search ,filter

Admin functionality for application ,modify status ,search ,delete and filter

I have to setup interview entity later For sprint 3

No blockers

### **Niosha**

Add job offer page. Create, delete , edit

Will add browse job offers

No blockers

### **Morteza**

Implemented TrackJobPost

2)Created SQL file to push sample data (test data) to local database

3)Updated README.md file ✓will implement Track Application Status , No blockage

TrackJobPost -- search and filter job post status by company name, find applicants (students) for each job post

### **Soroor**

Worked on the Ui for multiple pages which were discarded, added two simple designs for login and registration

Will work on login functionality
