Hi everyone,

Here is some information and the notes from the discussion yesterday.

Review User Stories

We reviewed and assigned the user stories as a group. They have been posted to the wiki.

<https://github.com/MajorTreble/WhateverJobYouChoose-Soen6011summer2023/wiki/User-Stories>

Plan Tasks

Everyone will review their user stories and break down the work into tasks and estimate the time. Remember that this includes javadoc and unit testing.

For example Build/upload a resume could be:

- Upload Resume 4h
- Create db table 4h
- Create new resume 2d
- Delete resume 4h
- Update resume 1d

We will review these on Sunday.

Choose Pod time

There is only one pod time left, Monday at 1pm with Mina. I will send her an email.

Agile Methodology

We discussed using Scrum as our Agile methodology.

- Soroor will act as the Product Owner and Chae as the Scrum Master.
- We decided to have scrum meetings every two days at 9 pm.
- Before committing changes, they need to be reviewed by at least one person in a pull request.

Project Framework

We had a discussion on the benefits of using the Play versus Spring frameworks.

- Each framework had two team members that were familiar with it.
- Both of them support the features we need though Play is limited to Java 11.
- Both support the MVC architecture
- Both can use hibernate.
- The Play framework is oriented towards using Scala.

We decided to use the Play framework as it was already setup.

<https://www.playframework.com/documentation/2.8.x/IDE>

Here are some basic commands:

- sbt compile
- sbt run
- sbt eclipse
- sbt doc
- sbt test
- sbt jacoco

Wiki

We started editing the user stories in a google document but decided to switch to using the github wiki.

ReadMe

Please update your information on the ReadMe with:

- the info of your team members (real name and GitHub user name, role/Strengths of the member in the project)

Next Meeting

We have a meeting on Sunday at 8pm on zoom.

Please share any questions, concerns, or suggestions.

Chae
