Hi everyone,

Only two people came to the meeting, Soroor and myself. Here is some information and the notes from the discussion.

Sprint Retrospective

We did a short retrospective. See attached

Two New Features

- Post on Feed

As a User, I want to post news on my wall so I can share information with everyone.

- Company Profile

As an Employer, I want to create a company profile so candidates read information about it.

Story Acceptance Criteria

Each story needs acceptance criteria. Please add some to your stories.

https://github.com/MajorTreble/WhateverJobYouChoose-Soen6011summer2023/wiki/User-Stories

You can use the format "Given - When - Then". For example, when the user forgets their password.

Scenario: Forgot Password
Given: The user navigates to the login page
When: The user selects 'forgot password' and enters his email address
Then: The system sends a link to the email address

Test Plan

We need to create a Test Plan. I created a template for everyone to add to. We also need to start doing unit tests.
